

Aqua Covers

SURESPAN type 'AQUA' reservoir Grade 316 stainless steel access cover, class EN124 pedestrian rated loading.

Surespan has launched an 'Aqua' range of reservoir hatches which have been designed with the help of the water authorities to provide protected access to reservoirs. Manufactured in grade 316 stainless steel, they incorporate a unique stainless steel micro mesh venting system which can be easily removed and washed. The unit comes complete with gas spring assisted lids, which are locked in the open position with safety hold open stays to prevent against accidental closure.

A stainless steel slam action cab lock is fitted as standard to lock the lids. The patent marine alloy frame has unique hinges which incorporate and unbroken neoprene seal to help prevent the ingress of dirt and moisture, offering a watertight seal. The unit will be supplied completely assembled and finished self-colour.

Other features and options:

Covers are designed to prevent the ingress of rainwater and animals and insects.
